SAMPLE SCORECARD · A 52-COVER LEVANTINE GRILL, JUMEIRAH, DUBAI

Saffron & Coal

great food, priced by habit.

SCORE 13 /25

Room to improve · bands 0–10 · 11–17 · 18–25

The grill section is the heart of this menu and it's well written. But prices sit in a column the eye scans first, the best-margin mezze are buried on page three, and delivery prices are close to dine-in after commission.

Read from: Dine-in menu (PDF, 4 pages) and delivery-app menu, both public · read 3 Nov 2026.

01 · LAYOUT

Where the eye lands

●●○○○ 2/5

Grills open page one; the mezze, your likely highest-margin section, start on page three.

Guests decide on the first spread they read. What's on page three is ordered by regulars, not newcomers.

Mezze start p.3 of 4

02 · PRICES

Price presentation & anchoring

●●○○○ 2/5

Prices are right-aligned in a dotted column, with 'AED' on every line.

A price column invites guests to scan for the cheapest line. Prices placed after the description are read last.

47 of 47 prices in a column

03 · WORDS

Descriptions that sell

●●●●○ 4/5

Grill descriptions name the cut, the marinade and the coal. Mezze are listed by name only.

One line of origin or method lifts choice more than a lower price. The mezze have none.

Avg 11 words · mezze avg 2

04 · RANGE

Item count & complexity

●●●○○ 3/5

47 dishes across 7 sections for 52 covers; five near-identical kebabs.

Every extra line costs prep, stock and decision time. Similar dishes split sales without adding any.

47 dishes · 5 kebabs

05 · CHANNELS

Dine-in vs delivery

●●○○○ 2/5

Delivery prices average 6% above dine-in; the app's commission is typically 25–30%.

If commission is larger than the mark-up, every delivery order earns less than the same dish at a table.

Median mark-up +6%

THREE FIXES YOU CAN MAKE THIS WEEK

01

Lose the price column

Move each price to the end of its description, drop 'AED' from every line, and remove the dotted leaders.

02

Bring mezze forward

Put a 'To start' box of five mezze on page one, opposite the grills, each with one line on how it's made.

03

Re-price the app

Set a separate delivery price list that covers commission and packaging. Start with the ten best sellers.

WHAT A FULL AUDIT WOULD ADD, USING YOUR SALES DATA

— Sales by dish over 8–13 weeks, from your POS export
— Plate cost for every dish, built with your head chef
— A keep, reprice, rework or retire decision for every dish
— A delivery price list that covers commission

MENU PROFIT BOOST AUDIT

Founding rate from USD 750 for our first five clients. About 10 working days, fully remote.

PRICE RANGE BY SECTION (AED)

HOW EACH AREA IS SCORED

	1 / 5	3 / 5	5 / 5
Layout	Key sections out of first view	Mixed placement	Best earners where the eye lands
Prices	Price column, symbols, no anchor	Some anchoring	Prices read after the dish; deliberate anchors
Words	Names only	Some sections described	Every dish earns a line
Range	Duplicates, too many lines	A few overlaps	Tight range the kitchen can deliver
Channels	Given away or missing	Partly priced	Priced to cover cost, actively sold
