SAMPLE SCORECARD · A 40-SEAT SPECIALTY CAFÉ, TIONG BAHRU, SINGAPORE

Ember & Oat

great coffee, quiet counter.

SCORE **14** /25

Room to improve · bands 0–10 · 11–17 · 18–25

The coffee list is tight and well priced. Most of the opportunity sits beside the coffee: the size ladder, milks and extras, the bakery counter, and how often a drink leaves with something to eat.

Read from: Counter board (photo, 2 panels) and Instagram highlight menu, both public · read 3 Nov 2026.

01 · LAYOUT

Where the eye lands

●●●○○ 3/5

Drinks fill the top of the board; food sits low and small, below eye level from the queue.

Guests decide in the few seconds before they order. If food isn't in view then, it isn't in the basket.

Food in bottom 30% of board

02 · PRICES

The size ladder

●●●○○ 3/5

Regular to large is only S$0.80, while the large uses about 50% more milk.

A narrow gap pushes guests to the size that earns least per ml of milk. A wider gap, or a medium, fixes it.

Gap S$0.80 · milk +50%

03 · WORDS

Descriptions that sell

●●●●○ 4/5

Coffee origins and roasters are described well; bakes are listed by name only.

One line on a bake ('baked here at 7am, brown butter') does more for the counter than a lower price.

Coffee avg 9 words · bakes 0

04 · RANGE

Item count & complexity

●●●○○ 3/5

Fourteen bakes for a 40-seat café, four of them close variations.

A long counter looks generous but drives waste at close. Fewer, better-placed bakes sell through.

14 bakes · 4 near-duplicates

05 · EXTRAS

Milks, add-ons & the second item

●○○○○ 1/5

Oat milk and extra shots are free; no coffee-and-bake pairing is offered.

Extras and pairings are where cafés make their margin. Given away, they quietly cost more than they seem.

3 of 4 extras free

THREE FIXES YOU CAN MAKE THIS WEEK

01

Price the extras

Charge for oat milk and extra shots at a level that covers their cost, and show it on the board.

02

Add one pairing

A morning 'coffee + bake' priced just below the two separately, shown at eye level.

03

Cut the counter by four

Drop the four slowest bakes for a month and count what's left at close.

WHAT A FULL AUDIT WOULD ADD, USING YOUR SALES DATA

— Sales by item, size and modifier over 8–13 weeks
— Cup cost for every drink and every extra
— Bakery sell-through and par levels by day of week
— A keep, reprice, rework or retire decision for every item

MENU PROFIT BOOST AUDIT

Founding rate from USD 750 for our first five clients. About 10 working days, fully remote.

FIRST-GLANCE READ · YOUR MENU, COMPRESSED

1 Food below eye level

2 Size gap S$0.80

3 Extras listed as free

PRICE RANGE BY SECTION (SGD)

HOW EACH AREA IS SCORED

	1 / 5	3 / 5	5 / 5
Layout	Key sections out of first view	Mixed placement	Best earners where the eye lands
Prices	Price column, symbols, no anchor	Some anchoring	Prices read after the dish; deliberate anchors
Words	Names only	Some sections described	Every dish earns a line
Range	Duplicates, too many lines	A few overlaps	Tight range the kitchen can deliver
Extras	Given away or missing	Partly priced	Priced to cover cost, actively sold
